SHAPED FOR COMFORT MADE FOR LIFE

KEBE is a technological front-runner when it comes to cold-cure moulded foam. For 40 years, we have been creating simple, contemporary design-led furniture using this unique and particularly durable material. Good craftsmanship, creative curiosity and the courage to challenge the status quo are the driving force behind our success story.

To us, “creative craftsmanship” means two things. First, using cold-cure foam gives us creative carte blanche. This material enables 360-degree modelling around the individual piece of furniture, so we can create aesthetic, comfortable, practical chairs and sofas that look elegant from all angles. Secondly, we control the entire design process ourselves. Drawings, prototypes, 3-D scans, 5-axis machining, production of castings and metal frames, processing of cold-cure foam, adaptation of upholstery, and rounds of intensive testing – all done under our own roof. This quality-assures the route from concept to finished design and gives us added flexibility to respond to customer wishes and needs.

Our products are:

- constructed around a forged metal frame, with 360-degree cold-cure moulded foam modelling,
- upholstered in high-quality fabric or leather from leading European tanneries
- made with the best design talent and created with stylish homes in mind,
- and last by not least – upholstered by people who take pride in complete mastery of their time-honoured craft.

That's why we provide a 3-year warranty on both the foam and the encapsulated frame.
