NORDIC BEAUTY ENCAPSULATED IN HANDMADE RUGS

Linie Design is a Danish design house with traditions deeply rooted in Scandinavian design and expertly handcrafted rugs. Founded in 1980, we are today the largest developer of handmade rugs in Northern Europe, distributing our unique designs to over 70 countries worldwide.

The secret to our success is intrinsically linked to our Nordic design traditions – clear lines, simplicity and uncluttered aesthetics – all woven together in uncompromising quality from start to finish. We use quality materials and time-honoured crafts to create timeless works of art for the floor, with a vision of filling homes with beauty and adding value to everyday lives by creating elegant and functional designs that are made to last.

TAKING CARE OF PEOPLE

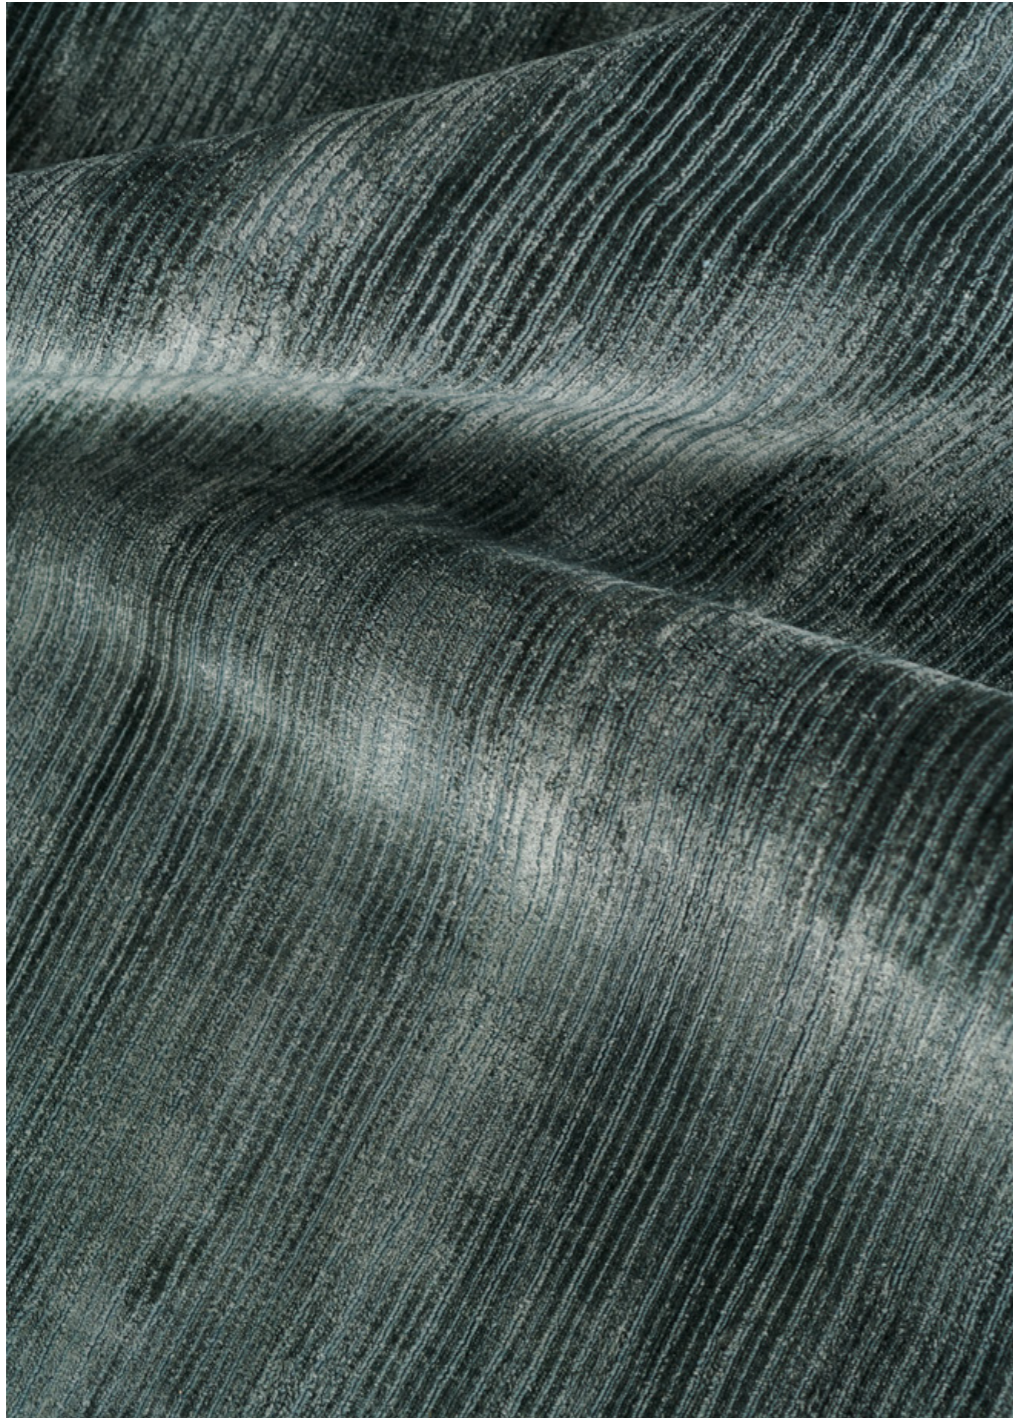

Linie Design is a member of CARE & FAIR.

At present, this organisation supports 9 schools, 6 adult education centres and 3 day care centres in India. Since the middle of 2008, we have fully sponsored one of the schools – thereby named Linie Design School. We pay all running expenses to ensure that more than 340 Indian pupils can go to school every day.

This way, we give the next generation a safer future.

Furthermore, the Women Empowerment Program is also actively supported by CARE & FAIR. Since 2002, mothers and older sisters of schoolchildren in some of the CARE & FAIR schools (including Linie Design School) have been given the opportunity to acquire basic knowledge in reading, maths and writing. In addition they are taught sewing and stitching skills that enable them to make products for selling in the market or using them for their own families.

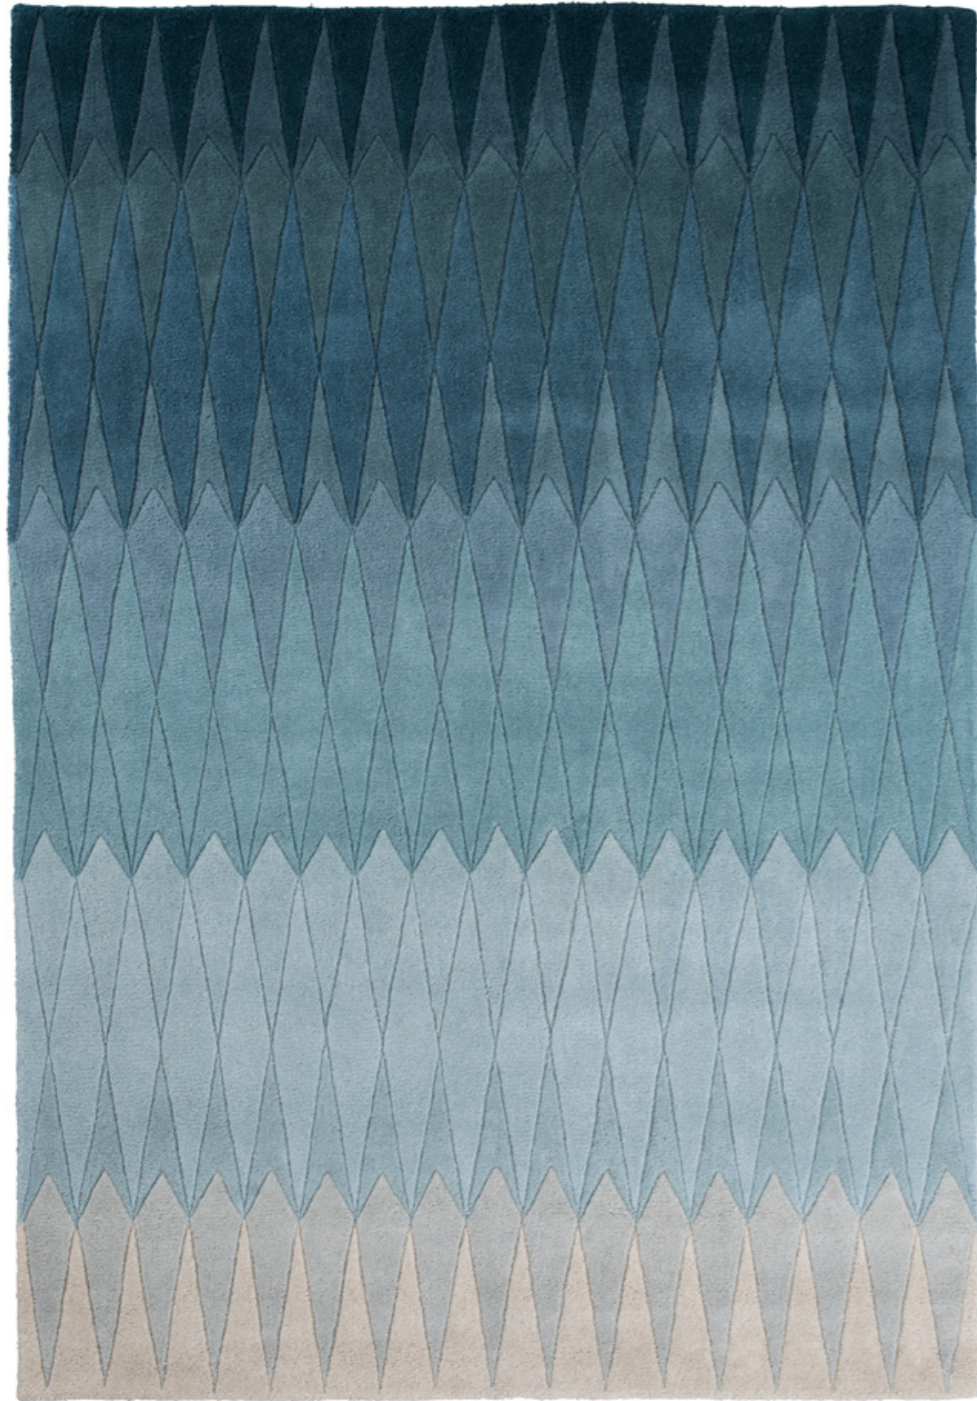

DESIGN PHILOSOPHY

Our expert designers create artistic rugs that appeal to the senses – inviting touch and offering visual stimulation. Rugs with bold and inventive designs that transcend the boundaries between art, expression and emotions. We create contemporary expressions using ancient techniques, fusing innovative and modern ideas with artisan crafts made with expertise passed down through the generations. A curated fusion of textures and colours that stays true to the authenticity of the materials and craft, yet is not afraid to explore new dimensions and innovative designs in contemporary contexts.

CREATIVE PROCESS

We offer an extensive product range that encompasses a whole myriad of colours, textures, shapes and patterns; there are no limits to the expressions that can be created at the hands of our skilled weavers. Endless considerations and selection processes are explored, examined and exacted when creating our handmade rugs. Factors such as the origin and type of yarn, technique and pattern, pile and knot count all have an impact on the tactile and visual elements, ensuring the creation of finely balanced compositions of form and expression.

ARTISANAL HERITAGE

All rugs are produced using slow craftsmanship, without the use of any machinery, and made from carefully selected materials chosen for their properties of superior quality, strength and durability. The result of this remarkable artistry is a timeless and long-lasting product that transcends trends and will endure many years to come. Fashions and lifestyles may be fleeting, and generations will inevitably change, but the timeless aesthetic of our rugs remains the same. Our passion for rugs is driven by creativity, innovation and sustainability, with the desire to transform imagination into beautiful forms that create a lasting expression and impression. One that can withstand the transience of time and be passed on as a treasured heirloom for generations to come.
